

## Switches

### Description:

All LEDingEDGE lighting luminaires can be easily controlled by using either our stand alone frosted On/Off Touch Switch or frosted On/Off Dimmer Switch. Utilizing our jumpers this stand alone feature allows for either switch to be located at a convenient location for the user. Our various LEDingEdge jumper lengths allows flexibility of the switch location.

### Features:

- Both switches can be used for both our Micro Mini and Mini series luminaires.
- Both switches turn lights on and off with soft touch control
- Compatible with 12VDC or 24 VDC
- Works with any LEDingEDGE luminaire series of up to 5-amps.
- Use only on the low voltage side of UL listed Class 2 LED Driver.
- Long operational life
- Made with solid-state lighting control modules

### Part Numbers:

- The On / Off Touch Switch utilizes the OFTS-12/24-F part number
- The On / Off Dimmer Switch utilize the OFD-12/24-F part number

### On / Off Touch Switch

### On / Off Dimmer Switch
